

Bad River Tribe – Fiber-to-the-Home (FTTH) Phase II Construction

The Bad River Tribe, in partnership with Multimedia Communications & Engineering (MCE) and Elexco Inc., is beginning construction for Phase II of the Rez Connect Fiber-to-the-Home (FTTH) Project.

 **Construction Start Date:** Monday, October 6, 2025

What to Expect:

- **Underground Utility Work:** Elexco crews will be working in designated areas. Residents may see paint and flag markers in their yards identifying underground utility lines.
- **Do Not Move Flags:** For safety, please do not remove any flags or markings. These will be removed by the crew once construction is complete.
- **Yard Restoration:** If landscaping is disturbed, crews will restore it to its original condition at the end of the project.
- **Traffic & Access:** Some temporary traffic adjustments and equipment staging may occur. Please use caution when driving near work zones.

Project Goals:

This project will expand high-speed fiber internet access across the Bad River Reservation and nearby communities, improving connectivity for families, businesses, and community services.
